Dyefix DR-119N

Fixing agent for reactive and direct dyes

I 、 Properties :

1. Appearance : clear liquid ◦
2. Ionic : cationic ◦
3. pH value (1% Solu.) : 7.5~8.5 ◦
4. Main component : polyalkylamine ◦
5. Solubility : easily dilutable with cold water ◦
6. Storage : good storagability ◦

II 、 Features :

1. Dyefix DR-119N is a fixing agent for reactive and direct dyes ◦ It can hence the washing fastness and light fastness ◦
2. Dyefix DR-119N has excellent property of very little change in shade and good fastness to hypochlorite bleaching ◦
3. Suitable in padding and exhausting process ◦

III 、 Application :

1.Exhausting process

Dyefix DR-119N	1~3g/l	
Temperature	50~60℃	
Time	20 minutes	pH=4~5

2.Padding process

Dyefix DR-119N	5~20g/l
pH=4~5	

3. The fixing temperature over pH=10 is avoided ◦

The information and data in this bulletin are baased on accurate laboratory researches and are intended for your giidance. We cannot, however, accept any responsibility for the results obtained, in view of the numerous factors of applications are beyond our control. Our guarantee is limited to the unvarying quality of our products.
