

Dyefix N Powder

Fixing agent to improve the washing fastness properties of dyeing with Acid Dyestuffs on polyamide fabric and decrease the transport cost °

I、Properties：

1. Appearance : Pale Yellowish powder °
2. Ionic : Anionic °
3. pH value (1% Solu.) : 7~8 °
4. Main component : Synthesis tannic acid °
5. Solubility : Easily dilutable with 60~80°C hot water °
6. Storage : Storage over 12 months in cool and dry place °

II、Features：

1. Dyefix N Powder is a powder- formed fixing agent with highest effective fixing property in dyeing Nylon, Wool and its blends. It can save huge transportation cost and easily be stored .
2. Because it is powder form, so the o.w.f of dosage can be reduced a lot in the dyeing bath °
3. Dyefix N Powder causes no more influence on the shade of color fabric after fixing process °
4. Improving the washing fastness of acid dyes on dyeing Nylon and Wool related fabric °

III、Application：

1.Dissolving Dyefix N Powder:

Dissolving Dyefix N Powder into 40% solu. with 60°C ~80°C hot water and stir it completely before using °

2.Improvement of the washing fastness

For Deep color: Dyefix N Powder(40% solu.) 2.0 ~ 4.0% o.w.f.

For middle color: Dyefix N Powder(40% solu.) 0.5 ~ 2.0% o.w.f.

80°C x20' pH=5.0~5.5

For obtaining the best washing fastness, it is recommended that the fixing process works in fresh bath °
