## Taigal RL

### ( Levelling Agent for Reactive Dyeing )

Taigal RL is a levelling agent for reactive or direct dyeing which can resist dyeing spots from dyestuff or metal ions gather , it provides the retardation required for prefect even result of dyed fabric .

#### I 、Features :

1. Low foam , low salt 、 resist high temperature .
2. Taigal RL prevents the different shads from dyes gather , especially suitable in cheese dyeing .
3. Taigal RL can provide even result by retardation .
4. There are no different shades from Taigal RL and chlorine ion of dyes together .

#### II 、Properties :

1. Appearance : yellowish transparent liquid .
2. Main component : special anionic surfactant .
3. pH value : neutral .
4. Solubility : easily dissolved in cold water .

#### III 、Application :

The usage quantity depends on the amount of dyestuff , generally 1~3% o.w.f.  
Taigal RL is recommended .

The information and data in this bulletin are baased on accurate laboratory researches and are intended for your giidance.  
We cannot, however, accept any responsibility for the results obtained, in view of the numerous factors of applications are beyond our control. Our guarantee is limited to the unvarying quality of our products.
